

ModQueue

Understanding the ModQueue

The ModQueue is used to let staff vet questions and not only ensure quality questions are asked but appropriate ones as well. Sometimes a guest may not read the Manga, or doesn't know much about the series, this gives you a chance to filter things.

Emotes used in reactions will vary by bot deployment

Worth mentioning that if you misflag a question, you can manually add the appropriate reaction to change it.

However, you will still need to delete the output message if there is one.

Revision #6
