

Audit Logging

REQUIRES: Manage Messages, Embed Links

Standard Logging

Doing `!log all` in a channel will automatically enable all log types to be posted in that channel.

Command	Descriptive Example
<code>!log current</code>	<code>!log current</code> - Displays the current logging settings
<code>!log all channel/off</code>	<code>!log all</code> - Enables/Disables all logging in that channel
<code>!log logtype channel / off</code>	<code>!log bans #ban-logs</code> - Sets a certain logging type to the channel <hr/> <code>!log bans off</code> - Removes a certain logging type from the channel
<code>!log pingroles add/rem logtype Role</code>	<code>!log pingroles add bans @Admin</code> - Adds a role to be pinged when a certain log is made
<code>!log pingroles rem all</code>	<code>!log pingroles rem all</code> - Removes all roles that were designated to be pinged when certain logs were made
<code>!log pingroles list</code>	<code>!log pingroles list</code> - Displays the list of roles designated to be pinged whenever a certain log is made

Available Log Types

- Bans
- Kicks
- Warns

- Mutes
- Images
- Spam
- Filters
- Settings
- Notifications
- Joinwatch
- Errors

Extreme Logging

This feature is reserved for Gaius Plus only. [Learn more.](#)

Command	Description
<code>!exlog current</code>	Displays the current extreme logging settings
<code>!exlog all</code>	Toggles all types on/off to be sent in that channel
<code>!exlog logtype(s) #channel</code>	Sets that log type to the specified channel channel
<code>!exlog logtype off/-1</code>	Disables that log type
<code>!exlog ignore channel</code>	Exlogs will not record that channel
<code>!exlog recog channel</code>	Exlogs stop ignoring that channel

Exlog Types

Name	Logs
<code>memberadd</code>	User joins, account age and other user information
<code>memberremove</code>	User leaves, when they joined and what roles they had
