

Message Filters

REQUIRES: Manage Messages

Invite Filter

Invite not found or type unknown

Filter invites in your community. For example: **discord.gg/**, **discordapp.com/invite**, etc.

Setup

Command	Description
<code>!filter invite</code>	Enable/Disable the invite filter.
<code>!whitelist add invitelink</code>	Allows that invite to be posted.
<code>!whitelist rem invitelink</code>	No longer allows that invite.
<code>!whitelist list</code>	Displays allowed links.
<code>!filter ignore invite #OptionalChannel</code>	Ignores invites in the channel again.
<code>!filter recog invite #OptionalChannel</code>	Filters invites in the channel again.
<code>!filter ignore invert invite #OptionalChannel</code>	Ignores invites in all channels except for the current or mentioned channel.

URL Filter

Filter all HTTP and HTTPS links in your server.

Setup

Command	Description
<code>!filter URL</code>	Enable/Disable the URL filter.
<code>!whitelist add link</code>	Allows that link to be posted.
<code>!whitelist rem link</code>	No longer allows that link.
<code>!whitelist list</code>	Displays allowed links.

!filter ignore URL #OptionalChannel	Ignores URL's filter in the channel again.
!filter recog URL #OptionalChannel	Filters URL's in the channel again.
!filter ignore invert URL #OptionalChannel	Ignores URL's in all channels except for the current or mentioned channel.

Channel Types

REQUIRES: Manage Messages

Types

Type	Description
image	Only allow image attachments.
url	Allows URL's as well but no accompanying text.
text	Allows text only if accompanied by a URL or attachment.

Setup

Command	Description
!ct #OptionalChannel type	Sets the channel type for that channel.
!ct #OptionalChannel type off	Removes the channel type for that channel.

BlockTag

Block user or role tags in chat so that the message is automatically deleted. You can either define a custom message or let the bot default one for you.
