

# SmartPrune

SmartPrune checks for and removes either people in your server currently missing a profile picture, or avatar, or invites that have been used less than a certain number of times. If you don't want people to know why they have been pruned from your server, you can say `nomessage` at the end of the command. This will tell Gaius not to send a message about why the pruned members were removed.

## Examples

Command	Descriptive Example
<code>!smartprune avatar [nomessage]</code>	<div><code>!smartprune avatar</code></div> <div>- Kicks everyone who doesn't have a profile image</div> <div><b>REQUIRED PERMISSIONS:</b> Kick Members</div>
<code>!smartprune norole [nomessage]</code>	<div><code>!smartprune norole nomessage</code></div> <div>- Kicks everyone who does not have a role</div> <div><b>REQUIRED PERMISSIONS:</b> Kick Members</div>
<code>!smartprune invite uses</code>	<div><code>!smartprune invite 5</code></div> <div>- Deletes all invites used less than a certain number times</div>

## FAQ

### Q. Will kicking Gaius reset the bot?

- No, kicking/banning Gaius will never reset your settings or [prefix](#).

## Q. Can I use smartprune for inactive people?

- This is not currently a feature. The best possible alternative is to use Discord's prune feature for people, however this will only prune people who have not logged into Discord for a certain period of time (including people with certain roles).

## Q. How do I see all the commands?

- The [help command](#) is man's best friend (not dogs).

---

# Video

*Not yet available*

If you have or find a video on Gaius specifically for what is covered in this documentation page, you can send the info to Fairy ? ?#0001 via DM (You must be in the [support server](#) in order to make contact).
