

StatTrack

Manage channels to display your server mini-stats and even display a clock for events and such in your community if you so choose.

REQUIRES: Manage channels

Free users are allowed one stattrack channel per feature (for example, one clock channel, one members channel, one online channel, etc).

Gaius Plus users are allowed multiple channels of the same stattrack feature.

Members

A total member count tracker displaying the number of total members when a member comes online, DND, idle, etc., in a customizable channel.

Setup ?

This is ordered by usage. Start with the first and move down the list. The **bold text** is required in the command; underlined is the channel name or channel ID; and italics are optional, but recommended.

Example	Description
!stattrack add members <u>channelName/ID</u>	Sets the channel for the member counter
!stattrack msg <u>channelName/ID</u> %d <i>Members</i>	Sets the stat format
!stattrack enable or disable <u>channelName/ID</u>	Enables or disables the member counter
!stattrack delete <u>channelName/ID</u>	Deletes the member counter on that channel (Y/N)
!stattrack current	Displays current stat channels, also removes those deleted

Online

A member online count tracker displaying the number of total online members when a member comes online, DND, idle, etc., in a customizable channel.

Setup ?

This is ordered by usage. Start with the first and move down the list. The **bold text** is required in the command; underlined is the channel name or channel ID; and italics are optional, but recommended.

Example	Description
!statrack add online <u>channelName/ID</u>	Sets the channel for the online counter
!statrack msg <u>channelName/ID</u> <i>%d Online</i>	Sets the stat format
!statrack enable or disable <u>channelName/ID</u>	Enables or disables the online counter
!statrack delete <u>channelName/ID</u>	Deletes the online counter on that channel (Y/N)
!statrack current	Displays current stat channels, also removes those deleted

Server Age

A server age counter that tracks the age (in days) of the server in a customizable channel.

Setup ?

This is ordered by usage. Start with the first and move down the list. The **bold text** is required in the command; underlined is the channel name or channel ID; and italics are optional, but recommended.

Example	Description
!statrack add age <u>channelName/ID</u>	Sets the channel for the age counter
!statrack msg <u>channelName/ID</u> <i>%d days old</i>	Sets the stat format
!statrack enable or disable <u>channelName/ID</u>	Enables or disables the age counter
!statrack delete <u>channelName/ID</u>	Deletes the age counter on that channel (Y/N)
!statrack current	Displays current stat channels, also removes those deleted

Clock

A clock that updates every 5 minutes, capable of displaying the day of the week, month, year, timezone, etc., in a completely customizable message in a customizable channel.

Setup ?

This is ordered by usage. Start with the first and move down the list. The **bold text** is required in the command; underlined is the channel name or channel ID; and italics are optional, but recommended.

The list of applicable time zones can be found [here](#).

Example	Description
!statrack add clock <u>channelName/ID</u>	Sets the channel for the clock
!statrack msg <u>channelName/ID</u> <i>%t %tzPST</i>	Sets the stat format
!statrack enable or disable <u>channelName/ID</u>	Enables or disables the clock
!statrack delete <u>channelName/ID</u>	Deletes the clock on that channel (Y/N)

!statttrack current	Displays current stat channels, also removes those deleted

Variables

Variable	Description	Example Display
%wd	Weekday	Sunday
%t	Time	8:49 pm
%tz ZONE %tz PST %tz EST %tz CST etc...	Timezone to use	PST
%-DST	Stops using DST time	
%24	24HR clock	21:49
%d	Day of the week	7
%m	Month	9
%y	Year	2020

Some examples would be

Example	Example Output
Currently %wd %t %tzEST %-DST	Currently Sunday 8:49pm
%d/%m %t %tzEST %24	14/7 21:49
%wd %d/%m %y	Sunday 14/7 2019
%t %tzEST %wd	8:49 pm Sunday
