

# StatTrack

Manage channels to display your server mini-stats and even display a clock for events and such in your community if you so choose.

**REQUIRES:** Manage channels

Free users are allowed one stattrack channel per feature (for example, one clock channel, one members channel, one online channel, etc).

Gaius Plus users are allowed multiple channels of the same stattrack feature.

## Members

A total member count tracker displaying the number of total members when a member comes online, DND, idle, etc., in a customizable channel.

## Setup ?

This is ordered by usage. Start with the first and move down the list. The **bold text** is required in the command; underlined is the channel name or channel ID; and italics are optional, but recommended.

Example	Description
!stattrack <b>add members</b> <u>channelName/ID</u>	Sets the channel for the <b>member</b> counter
!stattrack <b>msg</b> <u>channelName/ID</u> %d <i>Members</i>	Sets the stat format
!stattrack <b>enable</b> or <b>disable</b> <u>channelName/ID</u>	Enables or disables the <b>member</b> counter
!stattrack <b>delete</b> <u>channelName/ID</u>	Deletes the <b>member</b> counter on that channel ( <b>Y/N</b> )
!stattrack <b>current</b>	Displays current stat channels, also removes those deleted

# Online

A member online count tracker displaying the number of total online members when a member comes online, DND, idle, etc., in a customizable channel.

## Setup ?

This is ordered by usage. Start with the first and move down the list. The **bold text** is required in the command; underlined is the channel name or channel ID; and italics are optional, but recommended.

Example	Description
!statrack <b>add online</b> <u>channelName/ID</u>	Sets the channel for the <b>online</b> counter
!statrack <b>msg</b> <u>channelName/ID</u> <i>%d Online</i>	Sets the stat format
!statrack <b>enable</b> or <b>disable</b> <u>channelName/ID</u>	Enables or disables the <b>online</b> counter
!statrack <b>delete</b> <u>channelName/ID</u>	Deletes the <b>online</b> counter on that channel (Y/N)
!statrack <b>current</b>	Displays current stat channels, also removes those deleted

# Server Age

A server age counter that tracks the age (in days) of the server in a customizable channel.

## Setup ?

This is ordered by usage. Start with the first and move down the list. The **bold text** is required in the command; underlined is the channel name or channel ID; and italics are optional, but recommended.

Example	Description
!statrack <b>add age</b> <u>channelName/ID</u>	Sets the channel for the <b>age</b> counter
!statrack <b>msg</b> <u>channelName/ID</u> <i>%d days old</i>	Sets the stat format
!statrack <b>enable</b> or <b>disable</b> <u>channelName/ID</u>	Enables or disables the <b>age</b> counter
!statrack <b>delete</b> <u>channelName/ID</u>	Deletes the <b>age</b> counter on that channel (Y/N)
!statrack <b>current</b>	Displays current stat channels, also removes those deleted

# Clock

A clock that updates every 5 minutes, capable of displaying the day of the week, month, year, timezone, etc., in a completely customizable message in a customizable channel.

## Setup ?

This is ordered by usage. Start with the first and move down the list. The **bold text** is required in the command; underlined is the channel name or channel ID; and italics are optional, but recommended.

The list of applicable time zones can be found [here](#).

Example	Description
!statrack <b>add clock</b> <u>channelName/ID</u>	Sets the channel for the <b>clock</b>
!statrack <b>msg</b> <u>channelName/ID</u> <i>%t %tzPST</i>	Sets the stat format
!statrack <b>enable</b> or <b>disable</b> <u>channelName/ID</u>	Enables or disables the <b>clock</b>
!statrack <b>delete</b> <u>channelName/ID</u>	Deletes the <b>clock</b> on that channel (Y/N)

!statttrack <b>current</b>	Displays current stat channels, also removes those deleted
----------------------------	--

# Variables

Variable	Description	Example Display
%wd	Weekday	Sunday
%t	Time	8:49 pm
%tz <b>ZONE</b> %tz <b>PST</b> %tz <b>EST</b> %tz <b>CST</b> etc...	<a href="#">Timezone to use</a>	PST
%-DST	Stops using DST time	
%24	24HR clock	21:49
%d	Day of the week	7
%m	Month	9
%y	Year	2020

## Some examples would be

Example	Example Output
Currently %wd %t %tzEST %-DST	Currently Sunday 8:49pm
%d/%m %t %tzEST %24	14/7 21:49
%wd %d/%m %y	Sunday 14/7 2019
%t %tzEST %wd	8:49 pm Sunday
