

Tools

A couple tools for facilitating games or solving simple disputes.

Commands

Command	Description	Example
>coin [%s] [#coins]	Flips a number of coins either all at once or after a short period of time	>coin %s 5
>dice [%s] [d#sides] [#dice]	Rolls Di(c)e at short intervals or all at once with a specified number of faces per die	>dice %s 5 >dice 2 d6
>calc	Basic calculator/temperature converter <i>Currently takes:</i> +, -, *, /, cos, tan, sin <i>Temperature conversions:</i> c2f, f2c, c2k, f2k, k2f, or k2c	>calc 34.63 + 63 / 92 * 5.15
>debug perms >debug cantaccess >debug canaccess >debug roles >debug manage	Debug the bot, specifically the permissions the bot has and the channels/roles it can manage.	
>get user >get [webp/png/jpg/gif/av] user	Get information about a user. If the user is not in the server the information will be limited. Provide a valid format to get only the user's avatar. Use 'av' as the format for whatever default avatar the user has.	>get @12312412412123 >get png 123124123123123
>guildinfo	Get generalized information about the current server, this includes bot specific information such as enabled modules and the current bot permissions.	
>me >me [webp/png/jpg/gif]	Get information about yourself as a member of the server.	>me >me png
>ping	It's a ping command, if you do it MAYBE I'll respond... maybe	

>say <i>message</i> >say <i>channel message</i>	With this command you can make all your friends jealous by pretending to be me, which of course you want to do, who wouldn't? That said, please don't make me say anything stupid. I would ask you not say anything you wouldn't say, but I know what you say, and I don't want to repeat it.	>say I am a bot >saysay #Channel I am a bot
>status >status #	Get the status of the bot, including uptime of specific shards and total numbers across all the shards.	>status >status 2

Revision #3
